Thomas Inge,Charles Reagan Wilson,2014-02-01 Offering a comprehensive view of the South s literary landscape past and present this volume of The New Encyclopedia of Southern Culture celebrates the region s ever flourishing literary culture and recognizes the ongoing evolution of the southern literary canon As new writers draw upon and reshape previous traditions southern literature has broadened and deepened its connections not just to the American literary mainstream but also to world literatures a development thoughtfully explored in the essays here Greatly expanding the content of the literature section in the original Encyclopedia this volume includes 31 thematic essays addressing major genres of literature theoretical categories such as regionalism the southern gothic and agrarianism and themes in southern writing such as food religion and sexuality Most striking is the fivefold increase in the number of biographical entries which introduce southern novelists playwrights poets and critics Special attention is given to contemporary writers and other individuals who have not been widely covered in previous scholarship Water Levels and Artesian Pressure in Observation Wells in the United States ,1936 Advanced Applications of Network Analysis in Marketing Science Chinmay Kakatkar,2018-02-09 The world today is becoming a highly connected place Firms consumers and the devices they use are increasingly part of a complex global network of connected entities These networks represent a gold mine for marketing scholars that may be interested in developing a better understanding of consumer behavior and for practitioners who are keen to discover new ways of gaining and retaining customers This cumulative dissertation focuses on the use of network analysis to generate and analyze novel data in marketing The work moves beyond the scope of traditional social network analysis to consider networks composed of different types of nodes at varying levels of granularity The key aim is to demonstrate that network analysis can be used to investigate novel explanatory and outcome variables that hold contextual meaning and can deepen our understanding of the research question at hand Essay 1 develops a predictive method based on product networks to identify customer projects in a retail setting Essays 2 and 3 show the value of network analysis in new product development by recasting product ideas as networks of their constituent features Essay 4 leverages network thinking to enable novel analyses of the fragmented and anonymized event data that will be generated in abundance by the Internet of Things Ultimately the essays showcase a selection of advanced applications of network analysis in marketing science that are arguably of value to scholars as well as

practitioners and likely to gain in relevance in the future
