Confessions of the Pricing Man Hermann Simon, 2015-10-20 The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer In all walks of life we constantly make decisions about whether something is worth our money or our time or try to convince others to part with their money or their time Price is the place where value and money meet From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store price is the most powerful and pervasive economic force in our day to day lives and one of the least understood The recipe for successful pricing often sounds like an exotic cocktail with equal parts psychology economics strategy tools and incentives stirred up together usually with just enough math to sour the taste That leads managers to water down the drink with hunches and rules of thumb or leave out the parts with which they don't feel comfortable While this makes for a sweeter drink it often lacks the punch to have an impact on the customer or on the business It doesn't have to be that way though as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes A world renowned speaker on pricing and a trusted advisor to Fortune 500 executives Simon's lifelong journey has taken him from rural farmers markets to a distinguished academic career to a long second career as an entrepreneur and management consultant to companies large and small throughout the world Along the way he has learned from Nobel Prize winners and leading management gurus and helped countless managers and executives use pricing as a way to create new markets grow their businesses and gain a sustained competitive advantage He also learned some tough personal lessons about value how people perceive it and how people profit from it In this engaging and practical narrative Simon leaves nothing out of the pricing cocktail but still makes it go down smoothly and leaves you wanting to learn more and do more as a consumer or as a business person You will never look at pricing the same way again

Cooking Data Cal (Crystal) Biruk, 2018-03-15 In *Cooking Data* Crystal Biruk offers an ethnographic account of research into the demographics of HIV and AIDS in Malawi to rethink the production of quantitative health data While research practices are often understood within a clean dirty binary Biruk shows that data are never clean rather they are always cooked during their production and inevitably entangled with the lives of those who produce them Examining how the relationships among fieldworkers supervisors respondents and foreign demographers shape data Biruk examines the ways in which units of information such as survey questions and numbers written onto questionnaires by fieldworkers acquire value as statistics that go on to shape national AIDS policy Her approach illustrates how on the ground dynamics and research cultures mediate the production of global health statistics in ways that impact local economies and formulations of power and expertise

Lean Thinking James P. Womack, Daniel T. Jones, 2013-09-26 *Lean Thinking* was launched in the fall of 1996 just in time for the recession of 1997 It told the story of how American European and Japanese firms applied a simple set of principles called lean thinking to survive the recession of 1991 and grow steadily in sales and profits through 1996 Even though the recession of 1997 never happened companies were starving for information on how to make themselves leaner and more efficient Now we are dealing with the recession of 2001 and the financial meltdown of 2002 So what happened to the exemplar firms profiled in *Lean Thinking* In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition

International Munich Chassis Symposium 2016 Prof. Dr. Peter E. Pfeffer,2016-08-15 In chassis development the three aspects of safety vehicle dynamics and ride comfort are at the top of the list of challenges to be faced Addressing this triad of

challenges becomes even more complex when the chassis is required to interact with assistance systems and other systems for fully automated driving. What is more, new demands are created by the introduction of modern electric and electronic architectures. All these requirements must be met by the chassis together with its subsystems: the steering, brakes, tires, and wheels. At the same time, all physical relationships and interactions have to be taken into account.
