Really? Jeremy Clarkson, 2019-10-03 JEREMY CLARKSON S LATEST AND MOST OUTRAGEOUS TAKE ON THE WORLD CLARKSON S BACK AND THIS TIME HE S PUTTING HIS FOOT DOWN From his first job as a travelling sales rep selling Paddington Bears to his latest wheeze as a gentleman farmer Jeremy Clarkson s love of cars has just about kept him out of trouble But in a persistently infuriating world sometimes you have to race full throttle at the speed bumps Because there s still plenty to get cross about including Why nothing good ever came out of a meeting Muesli s unmentionable side effects Navigating London when every single road is being dug up at once People who read online reviews of dishwashers ing driverless cars Buckle up for a bumpy ride you re holding the only book in history to require seatbelts Praise for Jeremy Clarkson Brilliant Laugh out loud Daily Telegraph Outrageously funny Will have you in stitches Time Out Very funny I cracked up laughing on the tube Evening Standard

The Faces and Stakes of Brand Insertion Sébastien

Lefait, Sandrine Villers, 2022-03-22 With traditional forms of advertisement facing increasing challenges brand placement the integration of a product or brand in a work of art has exploded It has become a lucrative phenomenon whose goal is to produce a reaction of purchase in the mind of the receiver reader viewer or listener This volume seeks to complement extant studies of product placement strategies by introducing a methodology more systematically related to the field of cultural studies especially where the reception and impact of product placement are concerned It explores the many iterations of brand placement in popular culture with a consideration of the crossover between advertisement and art in everything from Wes Anderson Blade Runner and the Fast and Furious franchise to music videos late night shows and plastic art The book considers the impact of brand placement in TV series on teenagers as well as the evolution of such placement in literature The originality of this volume is that when the impact of the placement is mentioned it is to be understood as an intended aesthetic impact at least as much as a prompt to buy a product Consequently the placement of consumer goods in a cultural production the book suggests may both increase the sales of specific products and positively impact the production s ratings This book is perfect for researchers and students interested in marketing brand placement mass media art film and cultural studies

Learning Rates of Electric Vehicles Andreas Zerfaß, 2017-07-25

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport related carbon dioxide CO₂ and air pollutant emissions However battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these vehicles Despite persisting shortfalls mechanisms such as technological learning and economics of scale promise to improve the techno economic performance of BEVs and PHEVs in the short to mid term Here the author seeks to obtain insight into the techno economic prospects of BEVs and PHEVs by i establishing experience curves and ii quantifying user costs and the costs of mitigating carbon dioxide and air pollutant

emissions in a time series analysis The analysis captures the situation in Germany between 2010 and 2016 **Focus On:**

Neacșu,2020-09-21 Vehicles are intrinsically linked to our lives This book covers all technical details of the vehicle electrification process with focus on power electronics The main challenge in vehicle electrification consists of replacing the engine based mechanical pneumatic or hydraulic ancillary energy sources with electrical energy processed through an electromagnetic device The book illustrates this evolutionary process with numerous series production examples for either of body or chassis systems from old milestones to futuristic luxury vehicles Electrification of ancillaries and electric propulsion eventually meet into an all electric vehicle and both processes rely heavily on power electronics Power electronics deals with electronic processing of electrical energy This makes it a support technology for the automotive industry All the automotive visions for the next decade 2020 2030 are built on top of power electronics and the automotive power electronics industry is expected at 15% compound annual growth rate the highest among all automotive technologies Hence automotive power electronics industry is very appealing for recent and future graduates The book structure follows the architecture of the electrical power system for a conventional engine based vehicle with a last chapter dedicated to an introduction onto electric propulsion The first part of the book describes automotive technologies for generation and distribution of electrical power as well as its usage within body systems chassis systems or lighting The second part explores deeper into the specifics of each component of the vehicle

electric power system Since cars have been on the streets for over 100 years each chapter starts with a list of historical achievements Recognizing the engineering effort span over more than a century ennobles the R D efforts of the new millennium Focus on history of electricity in vehicle applications is another attractive treat of the book The book fills a gap between books targeting practical education and works sharing advanced academic vision offering students and academics a quick tour of the basic tools and long standing infrastructure and offering practicing engineers an introduction on newly introduced power electronics based technologies It is therefore recommended as a must have book for students and early graduates in automotive power electronics activities

Integrated High-Vin Multi-MHz Converters Jürgen

Wittmann,2019-09-03 This book provides readers with guidelines for designing integrated multi MHz switching converters for input voltages system supplies up to 50V or higher Coverage includes converter theory converter architectures circuit design efficiency sizing of passives technology aspects etc The author discusses new circuit designs new architectures and new switching concepts including dead time control and soft switching techniques that overcome current limitations of these converters The discussion includes technology related issues and helps readers to choose the right technology for fast switching converters This book discusses benefits and drawbacks in terms of integration size and cost efficiency and complexity and enables readers to make trade offs in design given different converter parameters Describes a study for increasing switching frequencies up to 30 MHz at input voltages up to 50V or higher in the scaling of the size of switching converter passives Analyzes various buck converter implementations and shows that a preference due to higher efficiency depends on the operating point on the available switch technologies and on the implementation of the high side supply generation Describes an efficiency model based on a four phase model which enables separation of loss causes and loss locations

Dependent Growth: Foreign

Investment and the Development of the Automotive Industry in East-Central Europe Petr Pavlínek,2017-04-07 This book offers a critical analysis of recent developments in the automotive industry of East Central Europe ECE Economists industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success This rapid growth has been based on large inflows of foreign direct investment FDI from Western Europe North America Japan and South Korea and it significantly contributed to GDP growth created thousands of new jobs and completely transformed the previously existing automotive industry in the region This volume

offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original detailed firm level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and conceptually the analysis will draw on the global production networks and global value chains perspectives. Drawing on the original empirical data and on additional available information this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s: The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s; The upgrading of the automotive industry in East Central Europe through FDI; The position of ECE in the automotive industry research and development R D; The effects of the 2008-2009 economic crisis in the automotive industry of ECE; The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s; The effects of FDI on domestic firms in the form of linkages between foreign owned and domestic firms and spillovers from foreign owned to domestic firms.

7th International Munich Chassis Symposium 2016 Prof. Dr. Peter E. Pfeffer, 2016-08-15 In chassis development the three aspects of safety, vehicle dynamics and ride comfort are at the top of the list of challenges to be faced. Addressing this triad of challenges becomes even more complex when the chassis is required to interact with assistance systems and other systems for fully automated driving. What is more, new demands are created by the introduction of modern electric and electronic architectures. All these requirements must be met by the chassis together with its subsystems: the steering, brakes, tires and wheels. At the same time, all physical relationships and interactions have to be taken into account.

L'Annuel de l'automobile 2024 Benoît Charette, Éric LeFrançois, 2023-09-02T00:00:00-04:00 UNE COURSE CONTRE LA MONTRE Le secteur automobile est à l'aube de ses plus grands changements depuis la mise en marche de la Model T. Il doit faire face à une transformation sans précédent. Les constructeurs tablissent la lutte de jeunes pousses alors que des sommes astronomiques sont dépensées pour entreprendre la transition électrique.
