Ask a Manager Alison Green, 2018-05-01 From the creator of the popular website Ask a Manager and New York's work advice columnist comes a witty practical guide to 200 difficult professional conversations featuring all new advice. There's a reason Alison Green has been called the Dear Abby of the work world. Ten years as a workplace advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully Green does and in this incredibly helpful book she tackles the tough discussions you may need to have during your career. You'll learn what to say when coworkers push their work on you, then take credit for it, you accidentally trash talk someone in an email, then hit reply all, you're being micromanaged or not being managed at all, you catch a colleague in a lie, your boss seems unhappy with your work, your cubemate's loud speakerphone is making you homicidal, you got drunk at the holiday party. Praise for Ask a Manager: A must read for anyone who works. Alison Green's advice boils down to the idea that you should be professional even when others are not and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work. Booklist starred review: The author's friendly, warm, no-nonsense writing is a pleasure to read and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management or anyone hoping to improve their work experience. Library Journal starred review: I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces and to do so with grace, confidence, and a sense of humor. Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide*. Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way. Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*.

A dynamic interplay between membranes and the cytoskeleton critical for cell development and signaling Clément Thomas, Christopher J Staiger, 2014-10-23 Various cellular processes underlying plant development and response to environmental cues rely on a dynamic interplay between membranes and the cytoskeleton e.g vesicle and organelle trafficking endocytosis exocytosis and signal transduction In recent years significant progress in the understanding of such interplay has been achieved and several critical links between membranes and the cytoskeleton have been characterized As an example recent work has clarified how auxin promotes the reorganization of cortical actin filaments by the activation of Rho GTPase pathways and how such reorganization in turn locally modifies endocytosis and or exocytosis and directs asymmetric distribution of PIN family of auxin transporters Another recent achievement is the characterization of the Rho and microtubule driven mechanism by which the cell wall architecture is established In particular the elegant work by Oda and Fukuda Science 337 p 1333 2012 provides evidence that secondary wall patterning in xylem vessel primarily relies on two processes a local activation of the plant Rho GTPase ROP11 and a mutual MIDD1 mediated inhibitory interaction between active ROP domains and cortical microtubules Additional examples include recent genetic evidence that microtubule and actin filament interacting regulatory proteins such as MAP65 1 and capping protein function as transducers of membrane lipid signaling into changes in cytoskeleton dynamics and organization This Research Topic aims at collecting a comprehensive set of articles dealing with cellular processes involving membrane cytoskeleton interactions Its scope extends beyond the specific fields defined by the above examples and includes intracellular trafficking host pathogen interactions response to biotic and abiotic stresses and hormonal regulation of growth We hope that this Research Topic will also highlight critical questions that need to be addressed in the future We welcomed Original Research Articles Technical Methodological Advances e.g analysis of cytoskeleton dynamics close to membranes Reviews and Mini Reviews that can expand our understanding of how and why membranes and the cytoskeleton interact
